ABSORBENT STATION (ACC9039)**

ABSORBENT STATION

These multi-use absorbent dispensers have many features and benefits but their primary objective is to centralise absorbents to a single point to encourage improved house keeping and aid in your "spill management programme".

They are available in two formats, maintenance or oil only and contain pads, perforated roll, and socks of the appropriate type.

Manufactured in painted steel or polyethylene the Poly Unit incorporates a lockable cabinet for consumables such as aerosols, and can be more cost effective than equivalent sized spill kits.
