

# OIL SPONGE MOBILE ABSORBENT STATION

This new innovative mobile spill station is the perfect partner for our new Oil Sponge absorbent. Used together you will have the most economical solution to all your spill problems.

The secret behind Oil Sponge is simple - reclaimed cotton fibres. These not only act as a highly effective absorbent, but also 'encapsulate' the liquid preventing it leaching back into the environment. Naturally produced from sustainable sources, it protects the environment, can be recycled, minimises waste, is bio-degradable and remediates both oils and petrochemicals.

## CLEAN UP PROCEDURE

**THE FACT THAT OIL SPONGE BINDS TOGETHER WHEN ABSORBING LIQUID, ALLOWS THE SATURATED LUMPS TO BE SEPARATED FROM THE UNUSED ABSORBENT.**

- 1. SPRINKLE OIL SPONGE GENEROUSLY ON THE SPILL**
- 2. COLLECT THE CONTAMINATED OIL SPONGE AND PUT IT ON THE SIEVE; ALL UNSATURATED ABSORBENT WILL FALL BACK INTO THE STATION**
- 3. DISPOSE OF THE SATURATED LUMPS REMAINING IN THE SIEVE**

## SAVINGS WHEN USING OIL SPONGE

with the Spill Response Station on a 90 litre spill, against using clay granules.

### NUMBER OF BAGS NEEDED

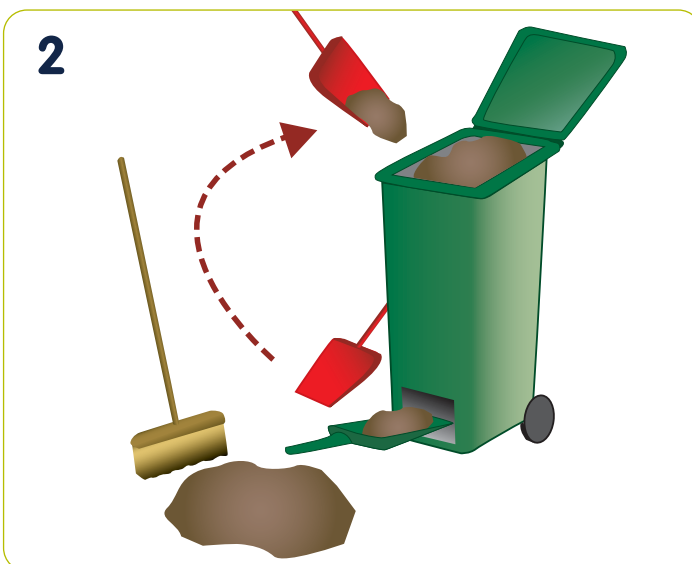

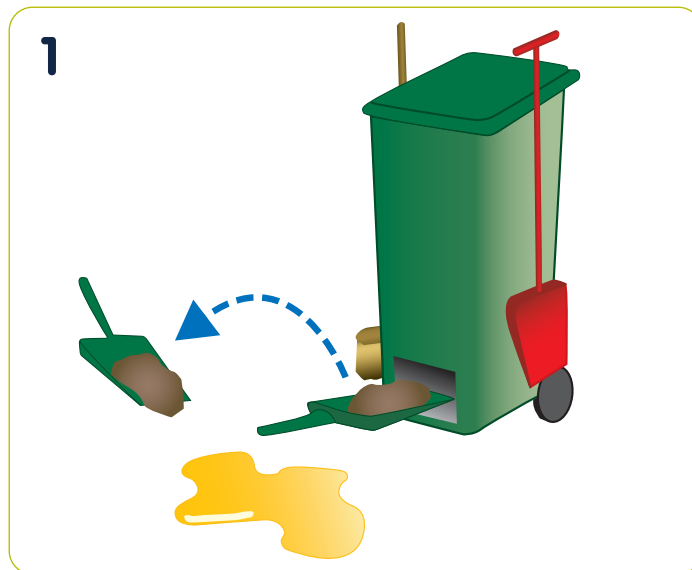

2 bags of oil sponge

16 bags of clay granules

PRODUCT CODE	DESCRIPTION	SIZE	PRICE
OSK2004	Spill Response Station		£286.00
OSK2005	Oil Sponge Absorbent	13.5kg (For use with Spill Response Station)	£49.00

**OIL SPONGE ABSORBS UP TO 8 TIMES MORE THAN CLAY GRANULES**
