

I.B.C. STORAGE UNITS

Designed to prevent environmental pollution and hazardous situations by containing accidental spills, these IBC storage units are of welded construction for added strength.

They feature removable galvanised grids and flooring, high and low level venting and leak proof sumps over the entire base area. Stainless steel and epoxy coated sump inserts are available as options for acids and alkalis.

BUNDED FLOORING

For the storage of potential water pollutants and flammable liquids where stringent safety regulations apply. Environmental protection is also required when dispensing, refilling or transporting such substances. Specifically designed for decanting and fluid transfer areas where the risk of spillage is higher than normal. Used as a modular system they can provide protection for the complete working floor area if necessary. This range of products is available in heights of 78 and 123mm, with a point load of 450kg or 2000kg to accommodate fork-lift truck traffic.

CORNER RAMP

FLOORING COMES IN MODULES, PRICE ON APPLICATION DUE TO MULTIPLE OPTIONS AVAILABLE.

STACKABLE TRANSPORT PALLETS

For the safe transportation of 205 litre drums (2 or 4), using a banded pallet with splash protection. Available either painted or galvanised, these units can be stacked up to three high.
