

1000LTR COMPOSITE IBC

The Ecobulk MX, with integrated bottom plate, offers superior stability and best protection to the inner container. Additional distinguishing features of the high-quality IBC system are easy discharge of contents and outstanding service life. ECOBULK MX components are made, without exception, for reconditioning and thereby meet the demand for multi-trip capabilities of transport packaging. Galvanised mild steel. 4-way entry galvanised mild steel perimeter pallet.
