

DISINFECTANT MATS

Dynamics disinfectant mats are a quick cost-effective way of delivering the chemical direct to the sole of visitor's shoes and boots. The range of sizes allow for use with cars, vans, tractors, and other HGVs. Importantly these heavy duty mats are strong and robust, ensuring a long operating life and have eyelets placed strategically around the corners and sides to allow for them to be securely fixed down. They also have good absorbent capacity to hold disinfectant and are designed to resist leaching when in use with heavy loads.

- Used extensively in 2001 Foot and Mouth Outbreak
- Proven reduced bacterial counts prove effectiveness of dispensing disinfectants into treads of tyres
- Replenish disinfectant as necessary
- No wastage of disinfectant
- Laid on concrete or tarmac with eyelets for effective fastening
- Constructed of super absorbent matting
- Reinforced PVC base, specially formulated chip foam insert, and tough polypropylene anti abrasive top mesh

PRODUCT CODE	SIZE(MM)	PRICE
DSM1	830 x 438 x 25	£95.00
DSM4	1830 x 830 x 25	£140.00
DSM6	2760 x 930 x 50	£325.00

DEFRA BIOSECURITY GUIDANCE DURING AN OUTBREAK OF AN EXOTIC NOTIFIABLE DISEASE

Transport of Animals (Cleaning and Disinfection) (No.3) Order 2003. The rules for commercial hauliers and farmers' own vehicles are the same. The main requirements include:

"wheels must be cleansed and disinfected when entering and leaving the premises"

Avian Influenza (Bird Flu): Possible control measures for Avian Influenza Disinfection at entrances and exits:

"The occupier of the premises shall provide and maintain appropriate means of disinfection at the entrance and exits of houses of poultry and of the premises."

This is a good practice in any event and could be adopted voluntarily by the industry as a matter of course."
