

INSTAMEND PIPE REPAIR BANDAGES

This repair system consists of a length of Nitrile Rubber bonded to a velcro fastener. When a leak occurs, wrap Instamend bandage around the pipe (under tension) and then fasten velcro. The repair is completed in under a minute and will last until a permanent repair is carried out with a suitable Dynamics Metal Repair System.

APPLICATIONS:

Machinery, Processing Plants, Mines and Quarries, Vehicles, Flexible Repairs, Moving Parts.

MOBILE OIL AND FLUID EXTRACTOR

These versatile manually operated vacuum pumps are ideal for fluid removal. The most common application is oil changing. By simply pumping the unit, a powerful vacuum is created inside the container. Then watch the oil get sucked out of the sump via the dipstick pipe or the filling point. Our quick, easy and clean fluid change process eliminates the need to remove drain plugs or tilt equipment. In areas that are confined or inaccessible Oil Extractors are the solution! The units are made from composite materials and are supplied with suction probes and an extension hose. They are also suitable for water.
